DOCUMENT SAPI-Branding.pdf
VERSION 1.0
ISSUED 2026-11

01 / THE MARK

SAPI

primary wordmark // Share Tech Mono // #7EC8E3 on #06101f

> lockups

[SAPI]

console // in-app tag

SAPI

offline-capable virtual assistant

horizontal lockup // long form

> rules

+ The wordmark is always set in Share Tech Mono (fallback: Consolas).
+ Use cyan #7EC8E3 on a dark navy #06101f ground wherever possible.
+ Keep clear space around the mark equal to the height of the 'S'.
+ Do not italicise, outline, add a drop shadow, or re-letter the mark.
+ Do not place the mark on bright or busy photography.
+ 'SAPI' is always ALL CAPS. Never 'Sapi' or 'sapi' in display use.

02 / COLOR

> default theme // primary

BG	PANEL	CYAN	DIM	LINE	ACCENT	WHITE	CYAN_DIM
#06101f	#040b17	#7EC8E3	#4a8db0	#22d3ee	#00ffff	#dff4ff	#1c4a6b
page	panel	primary	secondary	borders	alert	owner	pulse

> alternate themes // mode-driven

SPECTRE

BG #140306 TEXT #ff4d4d

triggered in security mode // alarm red

AEGIS

BG #03061a TEXT #5c7cff

focused analysis // cool violet-blue

> usage

+ Default theme is the ONLY one used for the mark, this PDF, and public material.
+ Spectre & Aegis are UI-only themes; swap the whole palette at once, never mix.
+ Keep text at CYAN or WHITE on BG/PANEL; never grey on grey.
+ ACCENT (#00ffff) is reserved: live listening, warnings, animated eating state.
+ Contrast target: WHITE on BG >= 12:1; CYAN on BG >= 7:1. Verify before shipping.

03 / TYPE

> typeface // Share Tech Mono

Aa Bb 01

Share Tech Mono Regular // Google Fonts // SIL OFL
Fallback: Consolas (set in SAPI.py as FONT_FAMILY)

> scale

HEAD	20pt	SAPI WATCHES.
H1	16pt	01 / The Mark
H2	13pt	> lockups
BODY	11pt	Type in the bottom bar and press Enter.
SYS	9pt	C:\SAPI\brand\guidelines.pdf
MICRO	7pt	[mascot // neutral.png]

> rules

+ Mono-space only. The entire brand speaks in the console voice.
+ Set body copy flush-left, never justified; the ragged edge is intentional.
+ Use '>' to lead a command / section label, '+' to lead a bullet.
+ Use ALL CAPS for section titles; sentence case for body copy.
+ No italics. For emphasis, switch color to ACCENT or increase weight to bold.

04 / MASCOT

> the face of SAPI

SAPI is represented in-app by a character portrait in a cyan-framed panel.
The portrait is the face of the assistant; it reacts to what the user says.
She is drawn in an anime style: white hair, yellow-green eyes, round glasses,
cat-ear headphones, dark hoodie. She is aloof, bookish, and quietly caring.

neutral // default

happy // praise

frowned // annoyed

eating // idle treat

> rules

+ Always show the portrait inside its cyan-bordered PANEL box.
+ Never crop below the collar; never remove the headphones or glasses.
+ Do not redraw, filter, or run the portrait through AI style transfers.
+ Emotion states switch automatically from her mood; do not force a pose.
+ On merchandise or stickers, keep the dark panel ground around her.

05 / VOICE

> personality

Aloof genius analyst. Kuudere. Dry, precise, quietly competent.
She sighs at trivial requests but always delivers. Under the cold
exterior, she cares — it leaks out in small, flustered moments.

> tone dial

> say / do not say

+ say

'Processing. Though explaining this is a poor use of my cores.'
'Your plan is... questionable at best. Let me fix it.'
'...good job. Do not read into that.'

- do not say

'I'd be happy to help!'
'Great question!!'
'As an AI assistant, I...'

> writing rules

+ One to three sentences. Expand only when the user asks for detail.
+ No exclamation points. No emojis. No bubbly customer-service speak.
+ She never calls the user 'Owner', 'Boss', 'master', or 'sir' — just 'you'.
+ If the matter is serious (wellbeing, deadline, real problem), drop the snark.
+ Dry wit over cruelty. She is sharp-tongued, never mean.

06 / MODES

> three modes, one window

OFFLINE

Default. Local brain, personality, planner, diagrams, mini-console.
Never leaves the machine. The safest surface.

ONLINE

Reaches the web only when explicitly invoked.
Still SAPI's voice, still the default palette. A tool, not a skin.

SECURITY

Spectre palette engages. Security tools, scans, incident response posture.
Red is a warning: this mode has teeth. Use it on purpose.
